## **British Museum tablets found to prove the Biblical Exodus**

*Astounding detail of hundreds of artefacts which provides real wide-ranging proof:*

- The Biblical Exodus was the cause of Amenhotep IV's 'Amarna Period'
- The name of the Exodus Pharaoh is now known to be Amenhotep III
- 'Pacifist' Akhenaten's (Amenhotep IV) army had been lost at sea.
- Akhenaten had almost no gold; it had been given to the Hebrews
- The mummy of the dead firstborn son of Pharaoh has been found
- Akhenaten was a second-born Pharaoh
- Amenhotep III died tragically and was publicly shamed thereafter
- Thousands of Egypt's gods were discredited at one time
- The 'Aten' as a sole powerful god was now featured uniquely
- The 'Amarna Letters' (many in the British Museum) are the key to this find.
- Archaeological evidence now confirms most aspects of the Exodus

A major new 190-page book by UK-based egyptology author Dirk Schroeder presents and discusses an amazing list of over 35 separate main points of evidence proving a link between the enigmatic 'Amarna Period' of Pharaoh Akhenaten, and the Biblical Exodus.

By connecting these areas of knowledge from two separate academic disciplines, Dirk reveals the powerful motivation behind the creation of the beautiful and peaceful Amarna Period, and solves many hitherto mysteries relating to Akhenaten's so-called 'pacifism' and 'monotheism', far outweighing any alternative theories or doubts which until now have been held.

The book will appeal to anyone who is captivated by this profoundly mysterious but beautiful era, but especially to a diverse range of Bible-believers and also to egyptologists at every level. The style of the book is progressive, for the benefit of those less familiar with the topic, whilst providing more scholarly detail as the book progresses.
